Dear Colleagues,

As we transition into spring, I want to remind all members about the upcoming ASPN/PAS Annual Meeting (May 2-5) in Baltimore, Maryland. If you haven’t already registered, it is not too late! You can still do so through the PAS website. The 2009 APSN Program Committee has assembled an outstanding scientific and educational program, including the launching of a lunchtime ASPN Literature Review Workshop! Please click here to learn more about the ASPN Award recipients who will be honored at the meeting.

I would also like to take this opportunity, on behalf of the ASPN, to thank Roz Lewy, Karen Argetsinger, and Vicki Norwood for their tireless work in establishing the John E. Lewy Foundation for Children’s Health as a lasting tribute and legacy to Dr. John E. Lewy’s extraordinary contributions to child health. Please see below to read more about this Foundation, which will be formally announced and launched at the ASPN Member Reception at the Baltimore Meeting.

Looking forward to seeing you in at the ASPN Annual Meeting in Baltimore and ASPN Capital Hill Day in Washington (click here)!

Lisa M. Satlin, MD
President

Moving Forward: Announcing the John E. Lewy Foundation for Children’s Health

The ASPN is honored and delighted to announce the establishment of the John E. Lewy Foundation for Children’s Health. Generously initiated by the Lewy family as a living remembrance of Dr. Lewy’s dedication to pediatric nephrology, pediatric advocacy and education, and the advancement of science, the Foundation will enhance and expand the ASPN missions of teaching, learning, discovery, and responsibility.

Dr. Lewy was a founding member of the ASPN and served as its President in 1980-81. He was the recipient of the ASPN Founder’s Award in 2000. In addition to excellence as a clinical nephrologist and researcher, Dr. Lewy trained hundreds of pediatricians during his tenure as Chair of Pediatrics at the Tulane University School of Medicine from 1978 – 2004. His advocacy for children spanned the spectrum from local to global health affairs, and he had recently completed his term as Chair of the Committee for Federal Government Affairs of the AAP at the time of his death.

In addition to providing support for future goals, the Foundation will allow the transition of financial support for ongoing initiatives from yearly appropriations from operating expenses into an endowed future using the strength of tax-exempt contributions from ASPN members, private donors, industry, and other partners. Early plans include:
• Development of “mini-sabbaticals or mini-fellowships” to improve trainee and member abilities in governmental processes affecting children’s health care and pediatric nephrology.
• Funding of trainee research and travel awards to encourage our future colleagues.
• Strengthening of partnerships with other organizations and industry to enhance global initiatives and provide support for advanced training and research.

There are doubtless many other possibilities for the Foundation to explore that would both further the mission of the ASPN and also honor Dr. Lewy’s boundless initiative, persistence, and mentorship.

Please join us for the official launch of the John E. Lewy Foundation for Children’s Health during the ASPN Member’s Reception at the PAS meeting in Baltimore at 8:30 PM on Saturday, May 2nd in the Watertable Ballroom at the Renaissance Harborsplace Hotel. Let us work together to draw on the legacy of one of pediatric nephrology’s true leaders to create a stronger future for the children in our care.

The AAP Section on Nephrology Henry Barnett Award is given this year to Julie Ingelfinger, MD. The Barnett Award is given to recognize the lifetime contributions of the recipient to clinical care, research and education.

A recognized leader in the field of pediatric nephrology, Dr. Ingelfinger has been on the faculty at Harvard Medical School for the past 35 years. She initially was at the Children’s Hospital and later moved to Massachusetts General Hospital. At Massachusetts General Hospital she served as co-chief of Pediatric Nephrology in 1989 and then chief in 1994, and eventually stepped down in 2001 to become Deputy Editor of the New England Journal of Medicine. She has been in continuous pediatric nephrology practice over this time frame taking care of children with kidney disease and hypertension. She has provided excellent and compassionate care to thousands of children. She has given numerous lectures all over the world teaching pediatric nephrology and the management of children with hypertension. She has also written numerous papers and articles and more importantly she has specifically written a book with her sister, Eugenia Zuckerman, for the lay public entitled “Coping with Prednisone”. This book has become an extraordinary help for families coping with children on steroids.

She has trained over 40 fellows during her time at Children’s Hospital and The Massachusetts General Hospital. Today, many of these former fellows have gone on to become chairmen of pediatrics and division chiefs. As a testament to her teaching skills, she was awarded the Dr. Donald N. Medearis teaching award twice, once in 1998 and then again in 2001 at the Massachusetts General Hospital.

She has had a long-standing interest in medical education. She served on the Board of Advisors for medical students, the Award Committee and the Committee for Redesign of the Principal Clinical Year.

She has also been a key member of the Women in Nephrology group, designed to assist in and promote achievements by women in the field of nephrology.

Concerning research, Julie is a giant in the field of hypertension. Her basic science laboratory has been continuously funded over the years by the NIH, NKF, JDF, AHA, and other foundations. She has had several NIH RO1 grants as well as grants from industry and foundations. She has published over 147 original papers. She has taken her research beyond the laboratory and is also a recognized authority in the treatment of children with hypertension.
2009 Founder’s Award Recipients

Drs. Jean E. Robillard and Fred G. Smith, Jr. have been selected to receive the 2009 Founder’s Award. This award is given each year to an ASPN member in recognition of unique and lasting contributions to the field of pediatric nephrology. Drs. Robillard and Smith have both contributed significantly to the ASPN by promoting its activities to assure a continuing role for its members in science as well as in specialized health care for children with kidney disease. Both will be recognized for their contributions during the ASPN Awards Luncheon on Monday, May 4th at the ASPN Annual Meeting in Baltimore.

2009 Trainee Research Award Recipients

Two awards are given annually at the ASPN meeting: one for best clinical abstract and one for best basic science abstract. This years recipients are listed below.

Clinical Research Awardee
Dagmara Borzych, MD
Sopot, Poland

Basic Research Awardee
Cynthia D’Alessandri-Silva, MD
Yale University Medical School
New Haven, CT

2009 Resident Travel Award Recipients

Each year the ASPN sponsors residents and selected other non-fellow trainees to attend the annual meeting. Stipends to partially support travel as well as complimentary registration are given on a competitive basis. The following are this years recipients:

Brett Ferguson, Children’s Hospital of Michigan
Sujana Gunta, University of Iowa Children’s Hospital
Yolanda Ng, Stony Brook University Hospital
Elaine KU, University of Southern California/LAC+USC Medical Center
Bryn Tschannen-Moran, U of Southern California/LAC+USC Medical Center
Julia Tzeng, David Geffen School of Medicine at UCLA
Gia Oh, University of California Davis Medical Center
Nilka De Jesus-Gonzalez, University Pediatric Hospital/U of Puerto Rico
Zachary Smith, University of North Carolina at Chapel Hill School of Medicine
Susan Jung, Albert Einstein College of Medicine, Schneider Children’s Hospital

On March 12, ASPN members Dr. Frederick Kaskel and Dr. Mona Khurana and pediatric patient Alisha Kahn and mother Sharda joined more than 70 patient and provider advocates for World Kidney Day to increase awareness about chronic kidney disease. During these meetings, advocates asked Members of Congress to co-sponsor legislation (H.R. 1458, S. 565) that would provide continued coverage for immunosuppressive drugs furnished Medicare patients that have received a kidney transplant and whose entitlement to coverage would otherwise expire. They also shared their stories about the unique nature and challenges of pediatric chronic kidney disease.

ASPN is heading back to Capitol Hill on May 6. Participants in ASPN’s Hill Day will visit with key committee staff to discuss ASPN’s principles for health reform. While in town, participants will also have the opportunity to meet with their congressional delegations. Although the deadline for participation has passed, you are encouraged to attend the advocacy training session during the annual meeting, on May 5 at 2:45pm. For more information, please contact ASPN’s Washington Representative, Katie Schubert at kschubert@dc-crd.com.

Dr. Frederick Kaskel, transplant patient Alisha Kahn and her mother Sharda meet Senator Kristen Gillibrand (D-NY).

ASPN posts Principles for Health Reform

The Society’s principles for health reform can be found here http://www.aspneph.com/HCRprinciples%202009%20Final%20(2).pdf. Members will be taking these to Capitol Hill on May 6 to present them to Congress.

Congress passes budget blueprint; begins FY2010 appropriations

Both the House and the Senate passed a $3.5 trillion spending plan outlined by President Obama earlier this month. The President’s first budget request would allow for his most ambitious and costly initiatives – including health care reform, more money for student loans, and climate change policy. Passage of the budget marks the beginning of the FY2010 appropriations process.

Meanwhile, President Obama signed into law an omnibus spending package for FY2009, totaling $410 billion, an increase of 8% over 2008 funding levels. This bill included funding for the Department of Health and Human Services and for the ninth year in a row, Congress also included report language submitted by the ASPN directing the National Institutes for Diabetes and Digestive and Kidney Diseases (NIDDK) to initiate two new prospective multicenter pediatric nephrology translational studies or treatment trials over the next two years.

Alisha and Sharda Kahn.

President Nominates HHS Secretary, Confirmation vote likely in April

President Obama nominated Gov. Kathleen Sebelius of Kansas for secretary of health and human services. She was Obama’s second choice for this post, after former Senator Tom Daschle was forced to withdraw his nomination over failure to pay all of his taxes. Sebelius will help push through the President’s ambitious plan to reform the nation’s health care system.

As governor, Sebelius called for universal health care. “We must commit ourselves to universal coverage, improved quality of care and increased affordability,” she said in her Jan. 10, 2007, State of the State address. No such program was enacted.

Prior to becoming governor of Kansas in 2002 Sebelius was the state’s insurance commissioner for eight years. A vote on Governor Sebelius’ confirmation is expected in April after the Senate returns from a two week recess.
HEALTH CARE REFORM TO MOVE BEFORE AUGUST

Senate Finance Committee Chairman Max Baucus (D-Mont.) set a deadline for getting a health care reform bill to the president, promising to have the measure out of committee by June and to President Obama by the end of summer. Committee ranking Republican Charles Grassley of Iowa called the timeline an “ambitious but achievable schedule.” Baucus plans to begin with a series of informal “walkthroughs” previewing the legislation to interest and advocacy groups in late April.

The House is also working on a health overhaul plan. The House Energy and Commerce Subcommittee on Health questioned Congressional Budget Office Director Douglas Elmendorf and Medicare Payment Advisory Commission Chairman Glenn Hackbarth about proposals to reduce costs in the health care system. Energy and Commerce Chairman Henry A. Waxman said he was “not wedded” to any specific overhaul plan and said that “the best approach” will be “one that we can pass.” The House Ways and Means Committee also held a hearing at the beginning of April on the matter.

Committee Updates

PROGRAM COMMITTEE

As the 2009 ASPN Annual Meeting draws near, the ASPN Program Committee is beginning to plan the 2010 ASPN Annual Meeting Program. The members of the 2010 Program Committee include: Susan Furth and Lisa Guay-Woodford (Co-Chairs), Vikas Dharnidharka, Patrick Brophy, Prasad Devarajan, Liz Ingulli, Kevin Meyers, Bill Smoyer and Colin White. We invite the ASPN membership to participate in planning the programming for the 2010 Annual Meeting. We would greatly appreciate if by May 1st, 2009 you could forward to us (sfurth@ihmi.edu or lw@genetics.uab.edu) your suggestions for themes, speakers, and talks for nephrology-specific or interdisciplinary symposia or workshops. Optimally, symposia are 50% clinical and 50% basic or translational. It would also be ideal if your suggestions could be crafted into the following format (with 4-6 potential speakers/ titles per session):

(Presented at the 2008 ASPN meeting):

Proposed Topic / Session Title: Pathophysiology of vesicoureteral reflux (VUR)

Proposed Chair Recommendations:

Iekuni Ichikawa, Vanderbilt University Medical Center

Carl Bates, Nationwide Children’s Hospital

Brief Description: (150 words or less)

Vesicoureteral reflux (VUR) is the most common congenital urogenital abnormality and reflux nephropathy is the 4th leading cause of chronic renal failure in children. The majority of patients with reflux nephropathy have had a history of urinary tract infections. Although VUR follows an autosomal dominant inheritance pattern, the genetics of the disease remains elusive. The first speaker will focus on recent animal models that reveal some of the mechanisms and natural history of VUR. The second speaker will present information on the genetics of VUR, as ascertained by genome wide screening approaches. The third speaker will discuss the findings of a recent clinical trial examining effectiveness of prophylactic antibiotics in patients with a history of VUR and febrile urinary tract infections. The fourth speaker will give an update on current perspectives on the treatment of patients with VUR.

Target Audience:

Clinicians and researchers who wish to learn more about the genetics, animal models, and current clinical approaches to managing patients with VUR

Proposed Topic & Speaker Recommendations:

1. Using the mouse to understand VUR
   Inga Murawski, Montreal Children’s Hospital Research Institute

2. Genetics of VUR
   Patricia Weng, MD, Mount Sinai Medical Center

3. Effectiveness of antibiotic prophylaxis in patients with VUR and pyelonephritis
   Eduardo H. Garin, MD, Shands Teaching Hospital/University of Florida

4. Vesicoureteral Reflux 2008: Shifting Sands
   Craig Peters, MD, University of Virginia

We greatly value your input and look forward to working with you to assemble an exciting program for 2010!

The 2010 ASPN Program Committee
Committee Updates Continued...

TRAIining & CeRTIfiCAtion COnmittee

On January 27, 2009 the Renal Research Institute annual meeting was held in Las Vegas and included, for the first time, a symposium devoted to Pediatric Nephrology. Twenty Pediatric Nephrology Fellows received scholarships to attend the 3 days of educational and scientific sessions. This Pediatric Nephrology initiative was the result of efforts initiated at the first ASPN Corporate Liaison Board Meeting (CLB) in June 2008 and completed via the engagement of one of our CLB members, Pat Ryder of Fresenius, and our ASPN Training and Certification Committee. Topics at the Pediatric Symposium included “The Administration of a Pediatric Dialysis Unit” (Deepa Chand), “Early Origins of CV disease in CKD” (Hiren Patel), “Pearls for the Care of Children and Adolescents with ESKD” (Maria Ferris, John Mahan) and “A “Hands on” Workshop on Dialysis Systems” (David Tauer, Pat Ryder and team). This was the first of what should be many future joint efforts between members of our society and our CLB partners to provide educational content for our fellows and members.

Other highlights:

- New content for residents who are considering a career in Pediatric Nephrology (“Considering a Career in Pediatric Nephrology”) has been placed on the ASPN website (www.aspneph.com) thanks to the efforts of John Hurley, John Mahan, Alicia Neu and Rita Swinford. Please send residents you know who might be interested in Pediatric Nephrology to this site.

- Two conference calls with Waldo Wenz (representative of the National Resident Match Program) and Pediatric Nephrology Training Program Directors were held in January and February to review NRMP Match processes in this first year of the Pediatric Nephrology Fellows Match (Match date for the class that is to start July 2010 is this June 12, 2009).

- Committee meetings in Baltimore for 1) the Training & Certification Committee in Baltimore (5/3/09 – 5:45-6:45 Hopkins Room, Baltimore Hilton) devoted to defining best methods to equip Pediatric Nephrologists for maintenance of certification and 2) the Training Program Directors Committee (5/4/09 – 7:00 – 8:00 AM Chase Room, Baltimore Hilton) devoted to Match discussions and plans for an upcoming 2009 Training Program Directors Workshop devoted to creating a standard Pediatric Nephrology Fellows curriculum.
